

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# PREFACE

This work is a complete index, to both plaintiffs and defendants, to all cases that have been reported in the one hundred and forty-seven California Reports. A carefully prepared and accurate index to all subsequent citations of such cases, whether made in the ruling opinions of the Supreme Court of the State or in the concurring or dissenting opinions of its individual justices.

The citations of each case are placed under the title of such case, so that the eye can take in at a glance the title of the case, the number of the volume and of the pages where it is reported, the volumes and pages where it has been subsequently cited, and the present standing of the case with the Supreme Court of the State.

## EXPLANATION

The use and value of this volume are so obvious to the practitioner that little explanation is necessary. To illustrate: The first case in the book is "Abadie v. Carrillo," and is reported, as shown, in Volume 32 of the California Reports on pages 172 to 176 inclusive. The figures following show that this case has since been cited by the Supreme Court of California eight times. The second case is "Abadie, Curia v.," and is the defendant's index. The figures showing where the case is reported have been purposely omitted in order to more readily distinguish it from the plaintiff's index. The book and page where the case is reported can readily be found by turning to "Curia v. Abadie."

Superior figures used in some instances show the subdivision of the syllabus of the original case which is referred to in the citation.

Letters following some citations indicate:

- a*—Approved.
- c*—Criticized.
- d*—Distinguished.
- o*—Overruled.
- n*—Note.

"In re's" have been indexed under *Ex Partes* and "Guardianships" under *Estates*.

References to United States Supreme Court Reports, American Decisions, American State Reports, Federal Reporter and other State reports, while extensive, are not complete. With this explanation this volume is respectfully submitted.

THE PUBLISHERS.

Los Angeles, October 1, 1906.

## **Palm's California Case Citations**

- Abadie v. Carrillo, 32:172-176; 39-586; 48-365; 49-145; 55-23;
